

# **SolarWinds Backup**

Cloud-first backup, without the cost and complexity

SolarWinds® Backup is designed to provide a streamlined, cloud-first data protection service for physical and virtual servers, workstations, business documents, and Microsoft 365™\* data in one web-based dashboard. Backup can help reduce the cost and complexity of data protection—without sacrificing speed or reliability. Storage in our global private cloud is included.

# **BUILT FOR THE CLOUD**

- Backing up to the cloud isn't an afterthought with SolarWinds Backup; it was built for that.
- TrueDelta deduplication, compression, and WAN optimization help make daily backups fast by sending only changed bytes.
- Cloud storage (including archiving) is included at no extra charge in data centers located worldwide.
- AES 256-bit encryption protects backup files in transit and at rest.

#### FLEXIBLE RECOVERY OPTIONS

- Get multiple recovery options from a single product, with no extra charges for different recovery methods.
- Leverage fast file- and folder-level recovery and full system recovery with bare-metal restore or virtual disaster recovery.
- · Create a standby server via our continuous recovery option.
- · Recover at LAN speed via the LocalSpeedVault option if needed.
- Test and verify backup recoverability on an automated schedule with recovery testing.

Removed files	Transferred size	Processed files	Processed size	Selected files	Selected size
0	1.40 MB	231	227 MB	118496	13.6 GB
950	173 MB	1966	1.10 GB	113592	20 GB
0	1.04 MB	233	229 MB	118496	13.6 GB
954	205 MB	2392	1.29 GB	113112	20 GB
0	1.14 MB	231	227 MB	118496	13.6 GB
968	191 MB	1990	1.27 GB	112639	20 GB
0	1 MB	231	227 MB	118496	13.6 GB

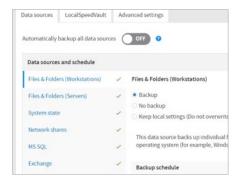

TrueDelta technology sends a fraction of the data over the WAN during daily backups.

## NO HARDWARE HASSLES

- SolarWinds Backup is a SaaS application—no need to install on or maintain a local application server.
- · No physical appliance needed, which helps save you time and money.
- No need to buy, provision, or manage local data storage for your backups. Storage in our private cloud is included.
- Keep an optional local copy of your data using an existing network share or other hardware with LocalSpeedVault.

#### EFFICIENCY AND EASE OF USE

- · Simplify backup management and spend less time on routine tasks.
- Manage server, workstation, document, and Microsoft 365™\* backups for multiple locations from a single dashboard.
- Automate backup deployment with device profiles to help provide consistent configurations.
- · Manage by exception with customizable views and reporting.

Define profiles for device types for auto-deployment to help save time and increase consistency.

# FEATURES AT A GLANCE

# **TrueDelta Technology**

- Byte-level change tracking between backups helps ensure only changed data gets sent over the WAN.
- Proprietary deduplication and compression technology means daily backups are a fraction of selected size.
- WAN optimization helps minimize bandwidth usage; bandwidth throttling is available during business hours for slow network connections.
- Restore only what has changed for efficient recovery.

# **End-to-End Security**

- AES 256-bit encryption is used to help secure files that remain encrypted in transit and at rest.
- Create your own private key or have one generated for you during deployment when using the standalone version. Integrated N-central Backup and RMM Managed Online Backup offer passphrase encryption.
- ISO-certified data centers are located worldwide, with additional certifications by location.
- Role-level access provided in the standalone edition
  of SolarWinds Backup lets you grant limited access to
  backups as needed. The N-central and RMM integrated
  versions use each platform's access controls.

## **Data Centers Around the World**

- Backup storage in our private cloud is included in your price.
- 30 data centers to choose from, located across four continents.
- ISO 27001, ISO 9001, and other certifications depending on your chosen data center.
- Using one vendor for your backup software and cloud storage simplifies billing and support.

# Microsoft 365 Data Protection\*

(standalone and integrated in N-central)

- Recovery of deleted items helps you keep control of your data in Microsoft 365.
- Manage Microsoft 365 backups from the same dashboard as server and workstation backups.
- **Up to seven years' data retention** to help meet regulatory requirements.
- Storage in our global private cloud is included.

	HIPAA	ISO27001	ISO9001	NIST 800-53	PCI DSS	SOC 1 TYPE II	SOC 2 TYPE

Backup data is stored in worldwide data centers built for security and regulatory compliance.

# SUPPORTED OPERATING SYSTEMS

Windows®	7, 8, 8.1 and 10
Windows Server®	2008 SP2, 2008 R2, SBS 2011, 2012, 2012 R2 and 2016 (limited), 2019 (limited)
	10.10 Yosemite
	10.11 El Capitan
macOS®	10.12 Sierra
IIIacos*	10.13 High Sierra
	10.14 Mojave
	10.15 Catalina
	CentOS 5, 6, 7
GNU/Linux®	Debian 5, 6, 7, 8
	OpenSUSE 11, 12

# DATA SOURCES FOR BACKUP

The Backup Manager handles **individual files and directories** as well as **complex systems**, such as:

- » Microsoft SQL Server®
- » Oracle®

» VMware<sup>®</sup>

- » MySQL®
- » Microsoft Hyper-V®
- » Microsoft Exchange

In addition, you can back up and recover the configuration of your **operating system** (the "System State" data source) and <u>Microsoft 365</u>. The N-central integrated version also supports Microsoft 365 data protection.

Please view <u>data sources documentation</u> for system compatibility details.

66 It's crazy how little data is sent in daily backups using SolarWinds [Backup]. We're backing up GBs of data, yet by using the LocalSpeedVault and TrueDelta, we're only transferring a couple of hundred MBs. Backups that used to take eight hours are now complete in ten minutes.

- Kyle Orr, Orr Systems

66 Simple to use, enterprise-class features, very fair on the storage limits, and no gimmicks. 24/7 support. Above all, I saved a client's burning building with this backup service. You can schedule backups nightly, twice a day, or down to every hour if you choose.

Jeff Oleinik, Newport Solutions

# **ADDITIONAL FEATURES**

Available on all supported operating systems

- » Multilingual support. You can use the Backup Manager in any of these seven languages: English, Dutch, Russian, German, Spanish, French, or Portuguese.
- » Remote management. You can send remote commands to the Backup Managers on your end users' devices.
- » Proxy connections. The Backup Manager can work from behind a proxy server.
- » Email reports. Receive email updates on status or recent backup and recovery sessions. This can be done by an end user in the Backup Manager or remotely by a service provider or a system administrator.
- **Bandwidth usage control.** Help ensure your bandwidth usage never exceeds a specified limit.

Management Console (Web)	https://backup.management/
Backup Manager	Client-side backup application available in English, Dutch, Russian, German, Spanish, French, Portuguese, and Norwegian
Virtual Drive	Optionally installed with the Backup Manager, this allows self-service access to backed-up data via local file browser
Recovery Console	Multi-instance recovery tool for setting up proactive or on-demand data recovery from servers and workstations to any location
Bare-Metal Recovery	Create bootable USB or CD media to recover your system directly to bare hardware without a prior OS installation
Server Tool	Self-service tool for managing seed uploads or downloads from almost any location
Storage Node Installer	Optional installer for self-hosted storage node
